

**ACCESS/PARKING:**

- Oscaleta Road, approximately 200 feet west of the intersection with West Mountain Road. [GPS Address: 16 Oscaleta Road]
- Sharp Hill Road or on shoulder of West Mountain Road directly in front of stone pillars marking trail entry point. [GPS Address: 1 Sharp Hill Road]

**DIFFICULTY:** Easy. Approximately 20 minutes.

**FEATURES:** Most of the trail is on a wooden walkway over wetlands and meandering streams. Ferns, mosses, and Spring wildflowers, especially marsh marigolds, violets, jack-in-the-pulpits, and skunk cabbage are abundant in the area. Birds, such as ducks and bluebirds, frequent this wooded wetland. A small loop trail traversing a higher rocky outcropping provides a wider view of the wetland terrain.

The water from this wetland drains into Pumping Station Swamp. This in turn drains into the Croton River and Reservoir System, which is part of the Hudson River watershed.

**HISTORY:** Seven acres of the property were purchased with Open Space Funds in 1992 from Peter and Carol Green. The remaining two acres were acquired from the Mountainwood subdivision.
